The Moon Sign Money Blueprint

*The money story written in your stars,
and how to begin reading it.*

Where the Moon Meets Your Money

Your birth chart holds a money story. Not your future, not a horoscope, a map of how you are wired to earn, feel about, and spend money.

Your Moon is the heart of it. The Moon rules your emotional world, which means it rules your relationship with security, scarcity, and the quiet ways money makes you feel safe, or makes you spend to feel better.

This blueprint gives you the framework and a first look at your Moon sign. Your full, personalized story, built from your exact birth data, lives in the Money Chart.

Read slowly. Notice what lands. The patterns you can see are the ones you can change.

The Three Currents

Every money chart runs on three currents.

The Sun, How You Earn

Your Sun is your earning engine: the energy you're here to be seen for and paid for. It's where your money momentum begins.

The Moon, How You Feel

Your Moon is your emotional wiring with money, what makes you feel safe, what makes you anxious, and what makes you spend to soothe.

♀ **Venus, How You Spend**

Your Venus is your taste and your pleasure: what you reach for, what you can't resist, and where your money quietly leaks.

The Quiet Lie

Money shadow work, in one idea.

Every sign tells itself a quiet lie about money, the soothing sentence that keeps the pattern in place.

“I’ll feel safe once I have enough.”

*You won’t. Enough was never a number.
Safety is something you generate.*

Naming the lie is the work. Once you can hear it, you can choose differently.

The Lunar Money Practice

New Moon, Plant

Set one financial intention. Open the account. Make the call you've been avoiding. Begin.

Full Moon, Review

Look honestly at what the cycle revealed. What worked? What leaked? What's ready to be released?

Do this for one lunar cycle and watch what shifts.

Money Journaling Prompts

Five questions worth sitting with.

- ① *What financial move have I been resisting because it feels too quiet?*
- ② *What emotion am I trying to soothe with money this week?*
- ③ *What does enough actually look like for me, not in dollars, in feelings?*
- ④ *Where am I undercharging, underearning, or under-asking?*
- ⑤ *What money story did I inherit that I'm ready to release?*
